EXPERIENCE

Bank Rakyat Indonesia (BRI), Jakarta

Dec 2025 – Present

(Associate IT - Project Officer 3 Level 6)

- Supported the delivery of internal banking system initiatives by analyzing business flows, operational needs, and end-to-end transaction processes.
- Translated business requirements into functional specifications, process flows, system behavior references, and implementation notes for development teams.
- Reviewed banking transaction flows related to teller activities, branch cash operations, vault processes, approvals, monitoring, reporting, and service integration.
- Coordinated with business users, QA, frontend, backend, and cross-functional teams to ensure requirements, test scenarios, and delivered features were aligned.
- Assisted SIT/UAT activities by validating transaction results, reviewing issue findings, analyzing logs, and ensuring system behavior matched business expectations.
- Supported production and pre-release issue analysis by checking transaction flow, request-response mapping, configuration, and integration behavior.
- Prepared documentation such as flow analysis, test evidence, issue summaries, implementation notes, and operational handover materials.
- Ensured system enhancements supported business requirements, operational controls, internal procedures, and banking service standards.

PT Steradian Data Optima, Jakarta

Feb 2025 – Dec 2025

(Backend Developer)

- Developed and maintained backend services for enterprise banking application projects using Golang, gRPC, REST APIs, Protobuf, and modular service architecture. Utilized PostgreSQL for database management and integration.
- Implemented banking transaction features, service integrations, data processing logic, and validation flows based on business and technical requirements.
- Built and maintained integrations with middleware and internal banking systems, including request-response mapping, transaction processing, response handling, and error mapping.
- Implemented caching strategies using Redis, scheduled background jobs with Go cron, and database operations using MySQL to support service performance and operational needs.
- Improved service reliability through structured logging, distributed tracing with Jaeger, timeout handling, validation logic, and standardized error management.
- Refactored legacy modules and optimized existing services to reduce code complexity, improve maintainability, and support code quality requirements.
- Developed unit tests and mocks using GoConvey, Testify, and sqlmock to increase test coverage and improve service reliability.
- Supported SIT/UAT activities, debugging, deployment checking, and configuration troubleshooting in OpenShift environments during release preparation.
- Collaborated with client-side teams, QA, frontend developers, and engineering teams to support smooth continuation and delivery of banking application features.

EDUCATION

Universitas Negeri Semarang, Semarang

Bachelor of Computer Science, Informatics Engineering

GPA 3.70 of 4.00

Honors: Cumlaude

Sep 2020 – Aug 2024

CERTIFICATIONS

Udemy

Course: Pemrograman Go-Lang

Sep 2024

Projects

SMS(System Management School)

Mar 2025 – Des 2025

Mobile Application Developer

- Developed RESTful and gRPC APIs using Golang for academic and administrative management.
- Implemented JWT-based authentication, role-based access control, and PostgreSQL database design.
- Optimized performance using Redis caching and Dockerized services for deployment readiness.

EDC Bank

Oct 2024 – Feb 2025

Mobile Application Developer

- Developed an EDC application using Java, designed for secure and efficient payment processing.
- Integrated payment gateway APIs to enable transactions through various payment methods, including credit cards and debit cards.
- Built a robust backend to manage transaction data, real-time processing, and ensure system reliability.

LANGUAGES AND SKILLS

- Bahasa Indonesia (Native), English (Professional Working Proficiency).
- Golang, Gin, PostgreSQL, Teamwork, Java, gRPC, Openshift, Microservices, MySQL, Jaeger, Unit Testing
- Passionate in: Web Development, Backend Developer, Android Developer
